

# Base Map How To Manual

When the map first opens it will be zoomed out to the City's Urban Growth Boundary.

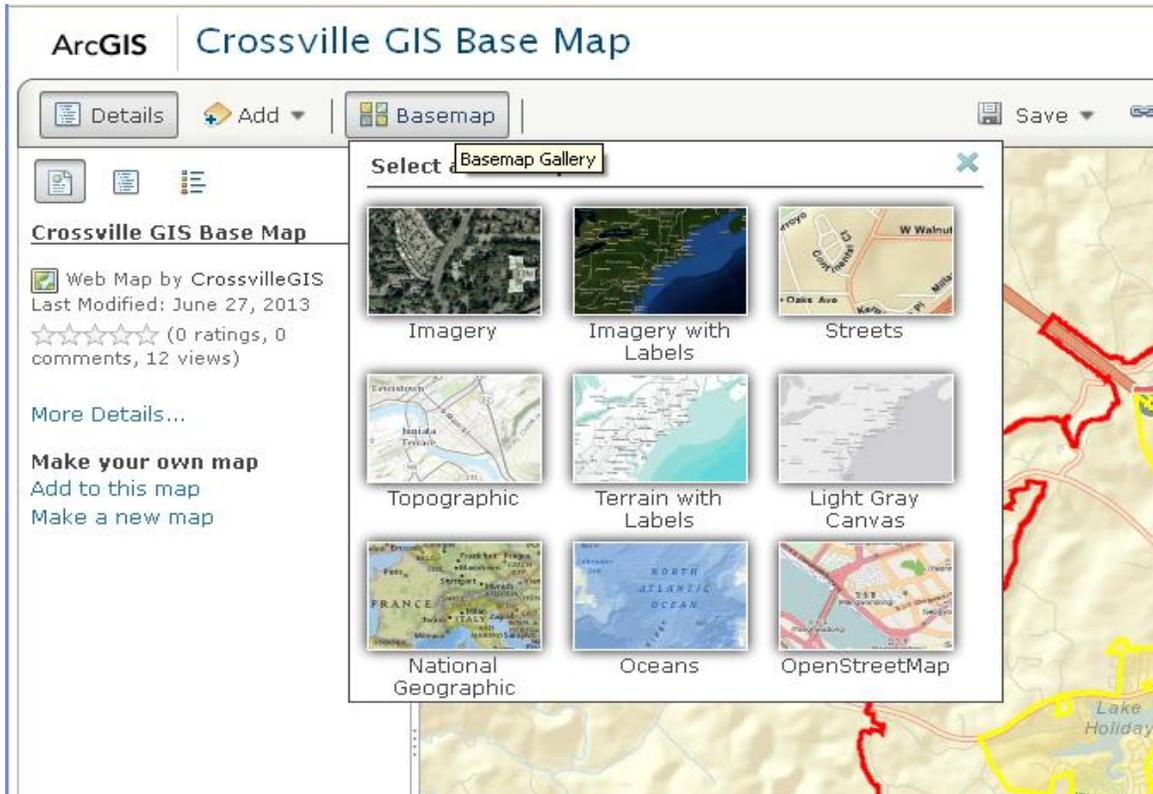

You can zoom in and out using the wheel on your mouse or by using the zoom bar located in the upper left hand side of the map screen.

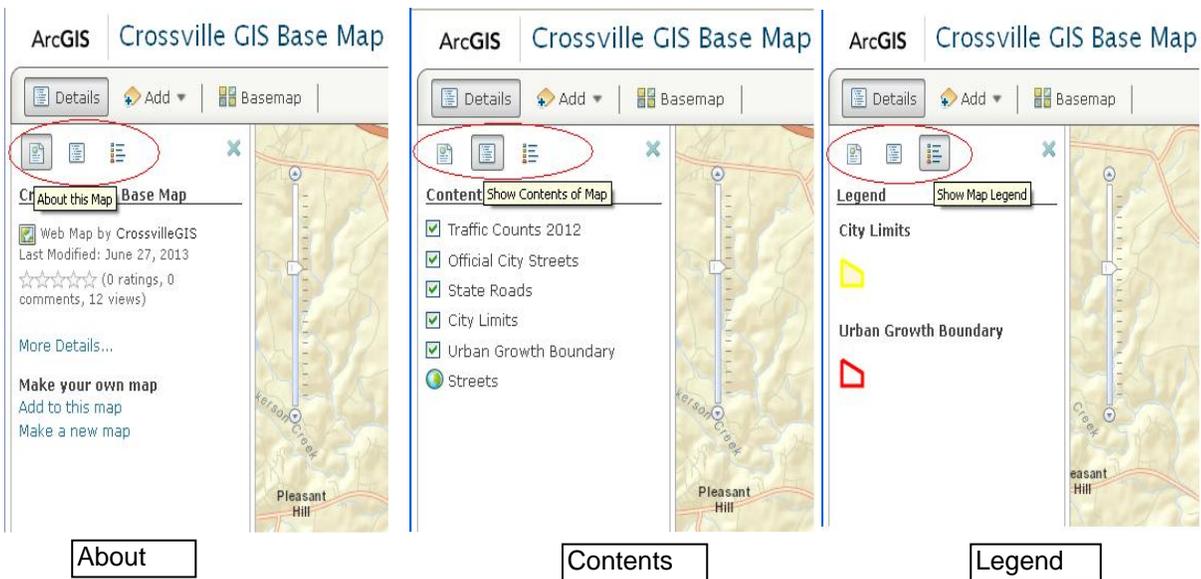

You may also Pan by left clicking on the mouse, and dragging it across the map screen.

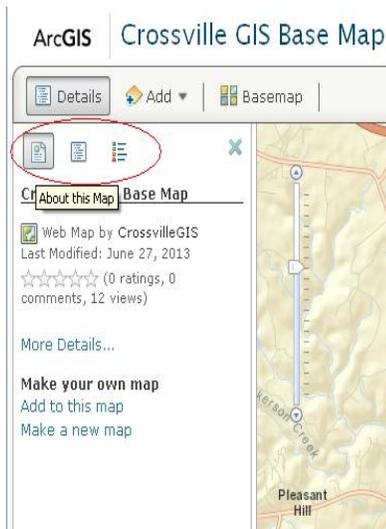

The current Basemap view is set to "Streets". You can change this by left clicking the Basemap tab and choosing a new basemap. The streets basemap contains road names.

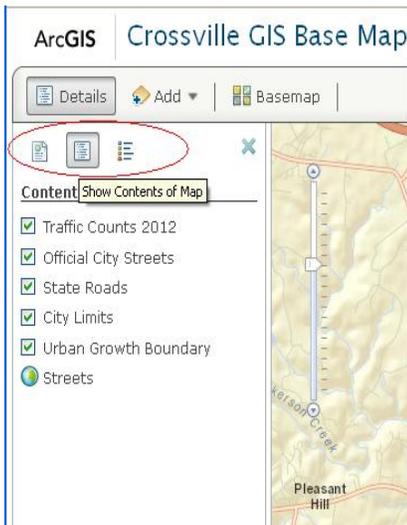

By default, the "About this Map" tab is selected. You can change the Details view by left clicking on the other options.

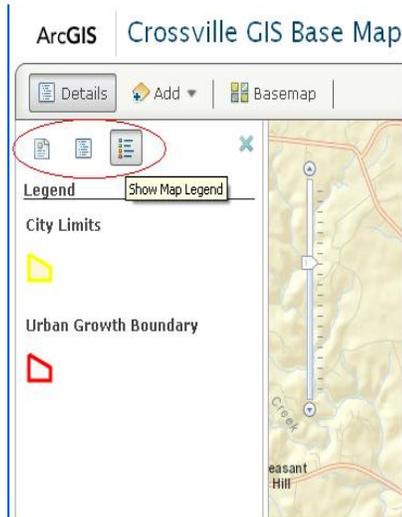

**About:**

The About tab displays the Creator of the Map as well as it's Last Modified Date and Other details.

**Contents:**

The Contents Tab displays all the GIS layers that are included in the map. Here is also the place where you can turn off and on layers. (NOTE: Even though a layer may be turned "On" it may not be displayed if there is a Display Scale set for that layer. Traffic Counts / City Streets / and State Roads will not appear on the map until you have zoomed in closer. This is done to cut down on map clutter.)

**Legend:**

The Legend Tab displays the legend of the map. It will show what each of the graphics shown on the map represent. (NOTE: Even though a layer may be turned "On" it may not be displayed if there is a Display Scale set for that layer. Traffic Counts / City Streets / and State Roads will not appear on the map until you have zoomed in closer. This is done to cut down on map clutter.)

Images and Data shown on this interactive map are subject to change without notice. Please review the "About" tab to see when the map was last updated.

The City of Crossville is not liable for any errors shown on this map. It is simply to be used as a reference tool. For any other information, please contact the City of Crossville's GIS Department.
