INTRODUCTION

INTRODUCTION

The "Annual Utility Rate Survey" is a comparison of residential utility rates in the East Tennessee Development District. The survey is conducted each summer and distributed to the utilities and local officials serving the region.

The survey only compares residential rates and does not attempt to survey commercial and industrial rates. Since utility rates can change at any time during the year, anyone interested in a specific utility's current rates should contact that utility directly.

Major changes were made in the gas section in 2000. ETDD hosted a meeting of all gas utilities in the region to discuss how best to survey gas companies. Since there are differences in how each gas utility adjusts its rates (some monthly and some annually) and the fact that there can be different BTU levels between utilities, it was decided to present a typical annual residential gas bill based on 4.1 MCF as of January 1 of each year. This monthly bill was multiplied by 12 to determine an annual bill for 50 MCF, for comparison purposes. Anyone using this data should also remember that BTU levels can vary between utilities.

Listed below are summaries of the 2014 survey:

<u>WATER</u>	<u>WASTEWATER</u>	<u>GAS</u>
Based on rate at 5,000 gallons	Based on rate at 5,000 gallons	Annual Usage Cost (Based on 50 MCF on Jan. 1, 2014)
